Important Screening Mammograms are a covered benefit

For women over the age of 40, mammograms once a year are a covered benefit. For women aged 20 to 39 with a high-risk diagnosis, mammograms once a year are also covered. And for women aged 35 to 39, mammograms are covered once within a 5-year period. They help detect breast cancer, even when you don't have any symptoms. Schedule this important screening today.

Annual Wellness Visit

Health in your hands

Annual wellness visits are important for good health

Preventive care tells you about your health before it gets bad. It is a covered benefit under your health plan. It includes regular visits to your primary care provider, screenings and vaccines.

All members of your family should see their primary care provider once a year for an annual wellness visit. These visits keep your family healthy. They can find and prevent problems before they happen.

Visit myuhc.com/communityplan to find a provider.
